

**IN THE UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF DELAWARE**

HTC CORPORATION,

Plaintiff,

v.

APPLE INC.,

Defendant

Civil Action No.: 11-785-GMS

DEMAND FOR JURY TRIAL

**REDACTED-PUBLIC
VERSION**

**DECLARATION OF CHRISTINE K. CORBETT IN SUPPORT OF APPLE INC.'S
MOTION TO DISMISS UNDER RULE 12(B)(1) FOR
LACK OF STANDING**

I, Christine K. Corbett, declare:

1. I am a partner at the law firm of DLA Piper LLP (US), counsel for Apple Inc. (“Apple”). I have personal knowledge of the facts stated herein and if called as a witness, could and would testify thereto.

2. Attached hereto as **Exhibit A** is a true and correct copy of a “Patent Purchase Agreement” between Google Inc. (“Google”) and HTC Corporation (“HTC”), produced by HTC in this case with the Bates numbers HTC785DEL00001850- HTC785DEL00001861.

3. Attached hereto as **Exhibit B** is a true and correct copy of an Initial Determination issued in an International Trade Commission investigation Inv. No. 337-TA-808, titled *Certain Electronic Devices with Communication Capabilities, Components Thereof, and Related Software* (“the 808 Investigation”), produced by HTC in this case with the Bates numbers HTC785DEL00002079- HTC785DEL00002094.

4. Attached hereto as **Exhibit C** is a true and correct copy of the Notice of Commission Decision Not to Review the Administrative Law Judge’s Initial Determination Partially Terminating the Investigation With Respect to Five Asserted Patents, issued in the 808

Investigation, produced by HTC in this case with the Bates numbers HTC785DEL00002209-
HTC785DEL00002211.

5. Attached hereto as **Exhibit D** is a true and correct copy of an article titled
“Google-Oracle trial: Android revenues revealed,” available at
<http://www.guardian.co.uk/technology/2012/apr/26/google-documents-search-revenue>.

6. Attached hereto as **Exhibit E** is a true and correct copy of an article titled,
“Google-Motorola: It’s All About the Patents,” available at
<http://blogs.wsj.com/deals/2011/08/15/google-motorola-its-all-about-the-patents>.

7. Attached hereto as **Exhibit F** is a true and correct copy of relevant excerpts from
Google Inc. Corporate Structure Tree from the S&P Capital IQ database.

8. Attached hereto as **Exhibit G** is a true and correct copy of relevant excerpts from
Google Inc. Suppliers from the S&P Capital IQ database.

9. Attached hereto as **Exhibit H** is a true and correct copy of a list of Google’s
mergers and acquisitions since December 2009 from the Mint Global database report on Google.

10. Attached hereto as **Exhibit I** is a true and correct copy of HTC’s privilege log.

. I declare under penalty of perjury under the laws of the United States of America that the
foregoing is true and correct. Executed this 22nd day of August, 2012 in East Palo Alto,
California.

Inv. No. 337-TA-808

ORDER NO. 15: INITIAL DETERMINATION GRANTING RESPONDENT APPLE, INC.'S MOTION FOR PARTIAL TERMINATION OF THE INVESTIGATION WITH RESPECT TO U.S. PATENT NOS. 6,473,006; 6,708,214; 6,868,283; 7,020,849; AND 7,289,772 DUE TO LACK OF STANDING

(June 8, 2012)

On May 15, 2012, respondent Apple Inc. ("Apple") filed a motion for partial termination of this Investigation with respect to U.S. Patent No. 6,708,214 ("the '214 patent"), U.S. Patent No. 6,473,006 ("the '006 patent"), U.S. Patent No. 7,020,849 ("the '849 patent"), U.S. Patent No. 6,868,283 ("the '283 patent"), and U.S. Patent No. 7,289,772 ("the '772 patent") ("the Google Patents"¹). (Motion Docket No. 808-035.) On May 25, 2012, complainant HTC Corp. ("HTC") filed an opposition to the motion. On May 25, 2012, the Commission Investigative Staff ("Staff") filed a response in support of the motion.

On May 31, 2012, Apple filed a Motion for Leave to File Reply in Support of its Motion for Partial Termination of the Investigation with Respect to U.S. Patent Nos. 6,473,006; 6,708,214; 6,868,283; 7,020,849; and 7,289,772 Due to Lack of Standing (Motion Docket No. 808-040) which is hereby GRANTED.

¹ HTC acquired certain rights in these patents from Google Inc. ("Google").

CONTAINS CONFIDENTIAL BUSINESS INFORMATION SUBJECT TO PROTECTIVE ORDER

I. BACKGROUND

On August 16, 2011, HTC filed a Complaint with the Commission pursuant to Section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. § 1337. (Docket No. 2841.) In its Complaint, HTC alleged violations of Section 337 based on infringement of one or more claims of patents other than the Google Patents, namely U.S. Patent No. 7,765,414 (“the ’414 patent”), U.S. Patent No. 7,417,944 (“the ’944 patent”), and U.S. Patent No. 7,672,219 (“the ’219 patent”) (collectively, the “Non-Google Patents”).

On August 29, 2011, HTC and Google entered in a Patent Purchase Agreement (“Agreement”) whereby HTC acquired certain rights related to the Google Patents [REDACTED]

[REDACTED] On September 7, 2011, HTC filed an Amended Complaint adding further allegations based on its newly acquired rights in the Google Patents.

The Agreement between HTC and Google purports to assign [REDACTED]
[REDACTED] However, under the Agreement, [REDACTED]

The Agreement provides for HTC [REDACTED]
[REDACTED]

CONTAINS CONFIDENTIAL BUSINESS INFORMATION SUBJECT TO PROTECTIVE ORDER

On October 3, 2011, Apple served its first set of requests for production to HTC that specifically requested the Agreement:

REQUEST FOR PRODUCTION NO. 71:

All documents and things relating to any communication between HTC and any other entity (including Apple, Openwave, ADC, Palmsource, Myriad, Google, and IEEE) regarding any of the Patents-In-Suit, or any patents related to the Patents-In-Suit including, without limitation, documents related to HTC's purchase of the Patents-In-Suit, ownership of the Patents-In-Suit, and any Standards, including, without limitation, the IEEE 802.11 Standard.

(Mot. Ex. D (emphasis added).) Over five months later, on March 19, 2012, HTC produced the Agreement. (Mot. Mem. at 5.) HTC continues to withhold production of communications between HTC and Google regarding this Investigation 

II. CONTENTIONS OF THE PARTIES

Apple's Contentions

Apple argues Google agreed to "sell" the Google Patents to HTC  but in reality Google granted HTC only illusory rights. Apple asserts unlike a true patent "owner," HTC's rights are both shared and subordinate to Google's retained rights, rendering HTC a non-exclusive rights holder whose actions are sharply curtailed by its obligations to Google.

CONTAINS CONFIDENTIAL BUSINESS INFORMATION SUBJECT TO PROTECTIVE ORDER

Apple avers the Google Patents are simply on loan to HTC while it litigates this action against Apple. [REDACTED]

Apple argues this Investigation must be terminated as to the Google Patents. Apple argues under well-established Federal Circuit and Commission case law, parties lacking “all substantial rights” in asserted patents lack standing to maintain a Section 337 action in their own name. Apple argues HTC possesses far fewer than “all substantial rights” necessary to maintain a Section 337 action in its own name, and thus good cause supports partial termination as to the Google Patents. Apple asserts partial termination of this Investigation will also prevent the ALJ, Staff, and Apple from wasting further resources in connection with the Google Patents that HTC has no right to assert. Apple therefore requests partial termination of this Investigation based on HTC's alleged lack of standing with respect to the Google Patents.

HTC's Contentions

HTC asserts that on August 29, 2011, Google executed a Patent Purchase Agreement stating that, [REDACTED]

[REDACTED] HTC asserts Google's assignment clearly, succinctly, and irrevocably transferred to HTC “all of its right, title, and interest” in, *inter alia*, the Google Patents without reservation of any substantial, exclusive rights. [REDACTED]

[REDACTED]

HTC argues that Apple fails to establish that Google's unqualified assignment to HTC of “all right, title and interest” in the Google Patents failed to convey all substantial exclusive rights or that any person other than HTC possesses any substantial, exclusive right under the Google Patents to bring suit against Apple for patent infringement. HTC argues Apple's motion is based

CONTAINS CONFIDENTIAL BUSINESS INFORMATION SUBJECT TO PROTECTIVE ORDER

primarily on HTC's [REDACTED]
[REDACTED] HTC argues its [REDACTED]
[REDACTED] are made under HTC's authority as the patent
owner and have no bearing on HTC's ownership of all substantial, exclusive rights. HTC further
argues that Google, [REDACTED]
[REDACTED] HTC argues that [REDACTED]
does not impact HTC's patent ownership, by assignment of all substantial rights, or impede
HTC's ability, without any other person, to maintain suit against Apple under the Google
Patents.

HTC argues that despite Apple's speculation about what might "make sense" for HTC,
the financial terms of HTC's agreement with Google do not detract from HTC's legal rights
under the agreement. HTC asserts it remains the one and only holder of legal title as well as the
holder of all substantial rights and therefore is the one and only party that has standing to assert
the Google Patents. Finally, HTC argues that the result Apple seeks here is unprecedented and
incorrect: a party holding both *legal title* as well as the exclusive right to enforce the patent
would not have standing to sue. HTC asserts under Apple's reasoning no one would be left with
standing to assert the patents at issue.

Staff's Contentions

The Staff argues the Agreement between Google and HTC appears to be nothing more
than a creative attempt to thread the needle of legal precedent so as to confer standing on HTC to
assert Google's patents. The Staff asserts the Agreement comes close to conferring standing, but
ultimately fails given, *inter alia*, the expansive rights retained by Google, and the apparent
intentions of Google and HTC. The Staff argues HTC's rights in the Google Patents are so

CONTAINS CONFIDENTIAL BUSINESS INFORMATION SUBJECT TO PROTECTIVE ORDER

encumbered as to render them illusory. Specifically, the Staff asserts HTC's right to dispose of the Google Patents is illusory and Google failed to convey exclusionary rights in the Google patents. Finally, the Staff argues that the terms of the agreement are inconsistent with an assignment. Accordingly, the Staff avers the Agreement fails to convey all substantial rights and, thus, HTC is a mere licensee without standing to assert the Google Patents.

III. STANDARDS OF LAW

Commission Rule 210.21(a) provides, *inter alia*, that "[a]ny party may move at any time prior to the issuance of the initial determination on violation ... to terminate an investigation in whole or in part ... for good cause...." 19 C.F.R. § 210.21(a).

Commission Rule 210.12 requires that intellectual property-based complaints filed by a private complainant "include a showing that at least one complainant is the owner or exclusive licensee of the subject intellectual property." 19 C.F.R. § 210.12(a)(7). In determining whether this requirement is met, the Commission has applied the standing requirement established by courts in patent infringement cases. *See Certain Catalyst Components and Catalysts for the Polymerization of Olefins*, Inv. No. 337-TA-307, Commission Opinion, 1990 ITC LEXIS 224, at *50 (June 18, 1990) ("[W]e see little basis for inferring a different standing requirement under section 337 than the courts have established in patent infringement cases."); *Certain Point of Sale Terminals & Components Thereof ("Point of Sale Terminals")*, Inv. No. 337-TA-524, Order No. 31 (February 7, 2005).

The question of whether a complainant lacks standing to assert a patent-in suit cannot be waived. *See Pandrol USA, LP v. Airboss Ry. Prods., Inc.*, 320 F.3d 1354, 1368 (Fed. Cir. 2003) (internal citation omitted) ("It is well-established that any party, and even the court *sua sponte*, can raise the issue of standing for the first time at any stage of the litigation, including on

CONTAINS CONFIDENTIAL BUSINESS INFORMATION SUBJECT TO PROTECTIVE ORDER

appeal.”); *Certain Variable Speed Wind Turbines and Components Thereof*, Inv. No. 337-TA-641, Comm’n Op., 2010 ITC LEXIS 2715, at *49-57 (Dec. 2010) (addressing a standing defense raised for the first time on petition for review of an initial determination).

It is well-settled that “a patentee who holds all the exclusionary rights and suffers constitution injury in fact from infringement is one entitled to sue for infringement in its own name.” *Morrow v. Microsoft Corp.*, 499 F.3d 1332, 1339 (Fed. Cir. 2007) (“*Morrow*”).

Moreover, an assignee also may acquire standing to assert a patent:

The patentee or his assigns may, by instrument in writing, assign, grant and convey, either, 1st, the whole patent, comprising the exclusive right to make, use, and vend the invention throughout the United States; or, 2d, an undivided part or share of that exclusive right; or, 3d, the exclusive right under the patent within and throughout a specified part of the United States. A transfer of either of these three kinds of interests is an assignment, properly speaking, and vests in the assignee a title in so much of the patent itself, with a right to sue infringers.... Any assignment or transfer, short of one of these, is a mere license, giving the licensee no title in the patent and no right to sue at law in his own name for an infringement.

Vaupel Textilmaschinen KG v. Meccanica Euro Italia SPA, 944 F.2d 870, 873-874 (Fed. Cir. 1991) (“*Vaupel*”), citing *Waterman v. Mackenzie*, 138 U.S. 252, 255 (1891) (“*Waterman*”) (citations omitted). Analyzing *Waterman* and its progeny, the Federal Circuit stated that “[t]he critical determination regarding a party’s ability to sue in its own name is whether an agreement transferring patent rights to that party is, in effect, an assignment or a mere license” and this determination is made by examining “whether the agreement transferred all substantial rights to the patents and whether the surrounding circumstances indicated an intent to do so.” *Asymmetrx, Inc. v. Biocare Medical, LLC*, 582 F.3d 1314, 1319 (Fed. Cir. 2009) (internal quotations omitted), citing *Vaupel*, 944 F.2d at 874. Moreover, “[w]hether a transfer of a particular right or interest under a patent is an assignment or a license does not depend upon the name by which it

CONTAINS CONFIDENTIAL BUSINESS INFORMATION SUBJECT TO PROTECTIVE ORDER

calls itself, but upon the legal effect of its provisions.” *Waterman*, 138 U.S. at 256.

IV. ANALYSIS

HTC argues it holds formal legal title to the Google Patents, “which alone should end the standing analysis.” (Mot. Mem. at 17.) I disagree. As an initial matter, the Assignment clearly states:

Notwithstanding anything to the contrary herein, Assignor is executing and delivering this Assignment in accordance with and subject to all of the terms and provisions of the Agreement. In the event of any conflict between the terms of this Assignment and those of the Agreement, *the terms of the Agreement shall be controlling.*

(Mot. Ex. C at 10 (emphasis added).)

Possession of a recorded assignment is only the beginning of the analysis. “To determine whether an agreement to transfer rights to a patent at issue amounts to an assignment or a license, we must ascertain the intention of the parties and examine the substance of what was granted.” *Aspex Eyewear, Inc. v. Miracle Optics, Inc.*, 434 F.3d 1336, 1340 (Fed. Cir. 2006); *id.* at 1342 (“[A]t bottom, the question is ‘who owns the patent’? Does the transfer or retention of certain rights amount to an assignment of the patent or not?”).

Indeed in *Certain Catalyst Components and Catalysts for the Polymerization of Olefins* (“*Catalyst Components*”), Inv. No. 337-TA-307, the Commission explicitly affirmed Order No. 23, which was an initial determination granting respondents’ motion to terminate. There the administrative law judge (“ALJ”) held that only the owner of “all substantial rights” in the patent-at-issue can satisfy the standing requirement and found that an assignment between a complainant and a foreign assignor did not transfer sufficient rights to complainant in that investigation to maintain standing.

Likewise, in *Certain Point of Sale Terminals and Components Thereof* (“*Point of Sale*

CONTAINS CONFIDENTIAL BUSINESS INFORMATION SUBJECT TO PROTECTIVE ORDER

Terminals”), 337-TA-524, the ALJ found that although there was a purported “patent assignment agreement” between complainant Verve and Omron Corporation (“Omron”), Omron retained substantial rights to the patent-at-issue such that the purported agreement assigning the patent rights to Verve constituted a mere non-exclusive license rather than an assignment. *Point of Sale Terminals*, Order No. 31 (Feb. 7, 2005).

I find the Agreement failed to transfer all substantial rights to HTC. First, HTC lacks the power to exclude others from practicing the inventions claimed in the Google Patents.

According to the Agreement:

The terms of the patent assignment agreement speak for themselves. HTC argues that

reinforces the parties’ intent that HTC is the title holder,

HTC’s argument is wholly unpersuasive. It is clear that

CONTAINS CONFIDENTIAL BUSINESS INFORMATION SUBJECT TO PROTECTIVE ORDER

[REDACTED]

[REDACTED] Google's retention of such a right is clearly indicative that HTC lacks "all substantial rights" to the Google patents.

In *Speedplay*, the Federal Circuit held that a right to sue was illusory when another party held the unfettered right to sublicense. *Speedplay, Inc. v. Bebob, Inc.*, 211 F.3d 1245, 1251 (Fed. Cir. 2000). In *Speedplay*, the grantor retained the right to sue, but granted to Speedplay an "exclusive worldwide, royalty-free, right and license under and to the Licensed Patents and the exclusive rights and license to manufacture, have manufactured, distribute, market, use and sell the Licensed Product and any other apparatus, instrument, device or product covered in whole or in part by the Licensed Patents." *Id.* at 1250. In addition, the agreement permitted Speedplay to exercise its granted rights through agents and sublicensees. *Id.* The Federal Circuit found the grantor's "right to sue an infringer if Speedplay does not is illusory, because Speedplay can render that right nugatory by granting the alleged infringer a royalty-free sublicense." *Id.* at 1251. The Court further found that "Speedplay thus controls enforcement of [the patent at issue] for all practical purposes." *Id.*

While the facts in *Speedplay* differ slightly from the facts presented in the instant motion, the principals underlying the Court's analysis in *Speedplay* are equally applicable here and dictate the same result. Here, the grantor, did not retain the right to sue, but did retain [REDACTED]

[REDACTED]

[REDACTED] and purported to transfer the right to sue to HTC, the outcome is the same. HTC's right to sue an infringer is illusory, because [REDACTED]

[REDACTED] Google thus controls enforcement of the Google Patents for all practical purposes.

CONTAINS CONFIDENTIAL BUSINESS INFORMATION SUBJECT TO PROTECTIVE ORDER

HTC's reliance on *Aspex* in support of its argument that "that a title holder can hold the rights needed to establish standing even though it had previously granted another party a 'virtually unfettered right to sublicense'" (Opp. at 19) is misplaced. In *Aspex*, the Federal Circuit explained that "*a virtually unrestricted authority to sublicense its rights under the agreement*" strongly favors a finding of an *assignment*, not a license. *Aspex*, 434 F.3d at 1342. However, the Federal Circuit found the transfer in *Aspex* to constitute a license because of a termination provision in the agreement at issue. *Id.* No such termination provision exists in the Agreement between HTC and Google.

Second, the ability to sue infringers is what gives the exclusionary right its power, and has been recognized as "particularly dispositive" in establishing standing. *Vaupel Textilmaschinen KG v. Meccanica Euro Italia S.P.A.*, 944 F.2d 870, 875 (Fed. Cir. 1991). Even ignoring the impact of [REDACTED] however, HTC's purported ability to sue is so sharply restricted by other terms in the Agreement that it cannot support enforcement of exclusionary rights. HTC also agreed [REDACTED]

[REDACTED] Further, HTC can only enforce the patents [REDACTED]

[REDACTED] The Agreement thus fails to transfer all substantial rights in the Google Patents to HTC.

Third, in *Propat*, the Federal Circuit considered an agreement where the transferor retained the right to veto any further transfers. *Propat International Corp. v. RPost, Inc.*, 473 F.3d 1187, 1191 (Fed. Cir. 2007) ("*Propat*"). In that case, the Federal Circuit found that "[t]he

CONTAINS CONFIDENTIAL BUSINESS INFORMATION SUBJECT TO PROTECTIVE ORDER

right to dispose of an asset is an important incident of ownership, and such a restriction on that right is a *strong indicator* that [an] agreement does not grant [] all substantial rights....”

Similarly, the Federal Circuit has found restrictions on the right to transfer to be “a fatal reservation of rights.” *Sicom Systems, Ltd. v. Agilent Technologies, Inc.*, 427 F.3d 971, 974 (Fed. Cir. 2005) (“*Sicom*”).

The Agreement between Google and HTC significantly [REDACTED]

[REDACTED] Any such assignees also must [REDACTED]

[REDACTED] Finally, if HTC nevertheless sells the Google Patents, HTC then must [REDACTED]

These terms render illusory any right HTC may have to dispose of its interests related to the Google Patents. Not only would HTC [REDACTED]

[REDACTED] As in *Propat* and *Sicom*, these restrictions on transfer are fatal. The Agreement thus fails to transfer all substantial rights in the Google Patents to HTC.

Fourth, HTC’s covenant and agreement that [REDACTED]

[REDACTED] is inconsistent with

HTC’s ownership of the patents. [REDACTED] Indeed, the [REDACTED]

[REDACTED] If

CONTAINS CONFIDENTIAL BUSINESS INFORMATION SUBJECT TO PROTECTIVE ORDER

Google truly intended to transfer ownership of the Google Patents to HTC, then Google would not be harmed, much less irreparably, by any of HTC's preexisting licensing relationships.

Further, if HTC licenses any of the Google Patents to a third party, it must then [REDACTED]

[REDACTED]

[REDACTED] HTC's right to freely license is illusory.

Finally, I am not persuaded by HTC's arguments regarding the intent of the parties. As noted by Apple, HTC offers no evidence that the parties considered [REDACTED]

[REDACTED]

[REDACTED] Indeed, HTC has prevented Apple, the Staff, and me from testing its arguments through discovery into the parties' negotiations over the Agreement by asserting [REDACTED]

[REDACTED] with Google and producing only heavily redacted emails excising any discussion of the parties' intent.² (*Id.* at 5-6.)

Moreover, I find HTC's assertion of [REDACTED] to be at odds with HTC's characterization of Google [REDACTED] (Opp. at 7-8.) As noted by Apple, the first entry of HTC's privilege log describes [REDACTED]

[REDACTED]

[REDACTED] I decline to address the question of Google's standing, as that issue is not ripe.

² The common interest privilege is not a privilege; rather it is an exception to the waiver rule.

CONTAINS CONFIDENTIAL BUSINESS INFORMATION SUBJECT TO PROTECTIVE ORDER

For the forgoing reasons, Motion Docket No. 808-035 is hereby GRANTED. U.S. Patent Nos. 6,708,214, 6,473,006, 7,020,849, 6,868,283, and 7,289,772 are hereby terminated from this Investigation. Nothing in this Order, however, shall be construed as a stay of discovery.

This Initial Determination is hereby certified to the Commission. Pursuant to 19 C.F.R. § 210.42(h), this Initial Determination shall become the determination of the Commission unless a party files a petition for review of the Initial Determination pursuant to 19 C.F.R. § 210.43(a), or the Commission, pursuant to 19 C.F.R. § 210.44, orders on its own motion a review of the Initial Determination or certain issues herein.

Within seven (7) days of the date of this Order, each party shall submit to the Office of the Administrative Law Judges a statement as to whether or not it seeks to have any portion of this document deleted from the public version. The parties' submissions may be made by facsimile and/or hard copy by the aforementioned date.

Any party seeking to have any portion of this document deleted from the public version thereof must submit to this office a copy of this document with red brackets indicating any portion asserted to contain confidential business information. The parties' submissions concerning the public version of this document need not be filed with the Commission Secretary.

SO ORDERED.

Investigation No. 337-TA-808

**NOTICE OF COMMISSION DECISION NOT TO REVIEW THE
ADMINISTRATIVE LAW JUDGE'S INITIAL DETERMINATION
PARTIALLY TERMINATING THE INVESTIGATION
WITH RESPECT TO FIVE ASSERTED PATENTS**

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review the presiding administrative law judge's ("ALJ") initial determination ("ID") (Order No. 15) partially terminating the investigation with respect to five asserted patents.

FOR FURTHER INFORMATION CONTACT: Sidney A. Rosenzweig, Office of the General Counsel, U.S. International Trade Commission, 500 E Street, S.W., Washington, D.C. 20436, telephone (202) 708-2532. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, S.W., Washington, D.C. 20436, telephone (202) 205-2000. General information concerning the Commission may also be obtained by accessing its Internet server at <http://www.usitc.gov>. The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at <http://edis.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205-1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on September 30, 2011, based on a complaint filed by HTC Corp. ("HTC") on August 16, 2011, alleging violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. § 1337 ("Section 337"), in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain electronic devices with communication

capabilities, components thereof, and related software by reason of infringement of three patents. The Notice of Investigation named Apple Inc. (“Apple”) as the respondent.

On August 29, 2011, HTC and third-party Google, Inc. (“Google”) entered into an Assignment of Patent Rights (“Assignment”) and a Patent Purchase Agreement (“Purchase Agreement”) whereby HTC acquired certain rights related to nine U.S. patents. On September 7, 2011, HTC filed an Amended Complaint adding further allegations of infringement based on its newly acquired rights in five of the nine U.S. patents, specifically U.S. Patent Nos. 6,473,006, 6,708,214, 6,868,283, 7,020,849 and 7,289,772 (collectively, “the Google Patents”). The Amended Complaint alleged that HTC “owns by assignment the entire right, title, and interest in and to” each of the Google Patents. HTC included a copy of the Assignment with the Amended Complaint, but did not include the Purchase Agreement, even though the Assignment expressly stated that it was subject to the Purchase Agreement, and that in the event of any conflict between the two documents, the terms of the Purchase Agreement trump the Assignment. Consequently, HTC’s ownership was always limited by the Purchase Agreement. On October 3, 2011, Apple served its first set of requests for production to HTC, which specifically requested documents related to HTC’s purchase and ownership of the patents-in-suit, including the Google Patents. Nonetheless, HTC withheld the Purchase Agreement until March 19, 2012, five months after Apple’s discovery request, and seven months after the amended complaint. HTC continues to withhold, on the basis of privilege and work product protection, most of the documents and correspondence surrounding the Purchase Agreement.

On May 15, 2012, Apple filed a motion for partial termination of this investigation with respect to the Google Patents on the basis that HTC lacks standing to maintain an action for infringement of the Google Patents, in view of the Assignment and the Purchase Agreement together. On May 25, 2012, HTC filed an opposition to Apple’s motion and the Commission investigative attorney (“IA”) filed a response in support of Apple. On May 31, 2012, Apple moved for leave to file a reply that accompanied its motion. On June 8, 2012, the presiding ALJ issued the subject ID (Order No. 15) granting Apple’s motion for leave to file a reply and Apple’s motion for partial termination of this Investigation with respect to the Google Patents due to lack of standing. On June 15, 2012, HTC petitioned for review of Order No. 15. Apple and the IA filed responses in opposition.

Having reviewed the record of this investigation, including the ALJ’s ID, the Assignment and the Purchase Agreement, the motions, petitions, and responses thereto, the Commission has determined not to review the ID. The Commission notes that HTC’s petition requests permission “to join on [*sic*] or more additional” and unspecified parties, HTC Pet. 29, despite the fact that there are no pending motions for joinder of these unidentified persons or for amendment of the Notice of Investigation. The Commission agrees with the ALJ that the issue is not yet ripe. Order No. 15 at 13. Accordingly, the Commission has not taken a position whether such other persons would have standing, *see* Apple Pet. Resp. 18, and, if they do, whether it would be appropriate to join them at this stage of the investigation in view of, *inter alia*, HTC’s delay in producing the Purchase Agreement.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. § 1337), and in section 210.42 of the Commission's Rules of Practice and Procedure (19 C.F.R. § 210.42).

By order of the Commission.

Google-Oracle trial: Android revenues revealed

Documents from 2010 projected that firm would get more than 35% of 2013 revenue from outside search operation

Charles Arthur and agencies
guardian.co.uk, Wednesday 25 April 2012 20.10 EDT

Google's Android chief Andy Rubin is questioned by Oracle lawyer David Boies during the trial over smartphone technology. Photograph: Reuters

Google projected back in October 2010 it would get more than 35% of its 2013 revenue from outside its search operation, anticipating that three non-search businesses – including e-commerce – would generate more than \$5bn (£3bn) each, according to internal company documents filed in court.

Display advertising would generate \$8bn in revenue in 2013, e-commerce would bring in \$5bn, while YouTube and Google TV would combine for \$5bn, according to documents revealed during the high-stakes trial of [Oracle](#) against Google over smartphone technology.

Search, meanwhile, had been pegged to generate \$34bn, the 2010 projections say, giving a forecast total revenue of \$52bn for 2013.

Those may turn out not to be far off. Official revenue figures suggest that Google is on track to generate more than \$40bn in total revenues this year, having reported first-quarter revenues of \$10.6bn earlier in April, up 24% on the same period in 2011.

Company staffers compiled the documents in October 2010 for a Google board presentation, according to testimony in a US district court in San Francisco on Wednesday.

Oracle lawyer David Boies briefly referred to the October 2010 documents on Wednesday while questioning Android mobile software chief Andy Rubin, but Boies did

not delve into the projections. However, a full copy of the internal documents has been formally admitted into evidence in the case.

The 2010 documents show that Google's search business generated \$19.2bn in 2009, while the display business brought in \$3.2bn that year. YouTube made \$300m, while e-commerce brought in no revenue.

Enterprise software was projected to generate \$2bn in revenue in 2013. Overlaying all of the business units are Google's Android and Chrome platforms, the documents said.

"Android and Chrome platforms critical assets for their success," the documents say.

Other documents entered as evidence come from an internal July 2010 presentation given by Rubin. They reveal that the company got advertising revenue of just \$16.8m from Android handsets in 2009, but by mid-year of 2010 that had grown to \$132.1m from ads on the fast-growing handset market – though Apple devices such as the iPhone and iPad using Google's search and maps generated \$281m, or more than twice as much in total.

Average ad revenues from Android handsets were higher, at \$9, than from Apple devices, at \$6.70, because Google has to pay a share of the revenues back to Apple.

The detailed breakdown of figures from Rubin's presentation show that after the costs of sales, marketing, engineering, product management and legal expenses were taken into account, the overall Android division was not expected to become profitable until 2011, by which time it was forecast to generate nearly \$500m in adverts.

However, sales of Android handsets have grown far more quickly than Rubin was forecasting at the time, suggesting that Google's Android revenues are far ahead of those figures. Google has told the media that the figures don't reflect the company's current thinking about its business operations.

The two sets of documents provide a rare glimpse into Google's mindset in 2010, as the company does not break down the percentage of its revenue that comes from search advertising versus its other businesses in official filings.

Google had fought in pre-trial hearings to exclude such commercially sensitive data from the public trial, but was overruled by the judge.

Estimating the ratio is complicated because of the limited information Google discloses about its various businesses. Analysts' estimates for Google's non-search business currently range from 10% of the company's revenue to as much as 25%.

"Their core business has done better than they were forecasting. Search is growing faster than 10% a year," said Colin Sebastian, an analyst at RW Baird. However, Google still has work to do in areas like commerce, he said, adding that Google's mobile wallet product has not made as much progress as it hoped.

"This document suggests those businesses may not be meeting Google's initial expectations," Sebastian said.

Google spokesman Jim Prosser said: "Our industry continues to evolve incredibly fast and so do our aspirations for our various products and services."

The Rubin presentation from July 2010 indicated that Google hoped that 10m Android tablets would be sold in 2011, and that it would achieve a 33% share of the market.

Overall, Rubin outlined an aggressive plan to generate more than \$1.2bn in total revenue from adverts and app sales on Android phones by 2013, although after costs such as revenue shares from adverts were subtracted, the contribution to Google's bottom line would be closer to \$500m.

But the rapid takeoff of Android sales since Rubin made his presentation, when there were just 20m Android handsets in operation – compared to more than 100m now – suggests that those targets may have been met sooner than was forecast.

Rubin outlined some causes for concern at the time, including Apple momentum with iPad, iPhone 4 [then newly launched] and that Google was behind [Apple and Amazon] on music, video and books. He also noted a low rate of app purchases.

At the time Android handsets were being activated at the rate of 180,000 per day. The figure now is more than 700,000.

Oracle has accused Google of violating its intellectual property rights to the Java programming language. An Oracle spokeswoman declined to comment on the figures.

In pre-trial settlement talks, Oracle had suggested that Google should pay a small percentage of ongoing Android revenues in settlement of another part of the trial dispute, in which Oracle claims its patents have been infringed.

Google-Motorola: It's All About the Patents

By Shira Ovide

Agence France-Presse/Getty Images

Our first thought when [Google announced a \\$12.5 billion purchase of Motorola Mobility](#): Holy cow. Google wants to be **Apple**.

Instead of visualizing Google CEO Larry Page in a Steve Jobs black turtleneck, think of Google's biggest ever deal as a shield against lawyers.

Yes, Apple's success with the iPod, iPhone and iPad prove the benefits of tightly meshing together easy-to-use hardware and software. Google has so far done the opposite with its Android

software for phones: let anyone who wants to make the hardware license the Android software. Free will!

But in theory, Google could go the Apple vertical route if it clinches ownership of Motorola Mobility and its phones, tablet computers and TV set top boxes. And that may eventually happen.

For now, though, Google says it doesn't want to do that. The company said it plans to operate Motorola as a separate company, which of course is a plan that is less likely to annoy the phone-handset makers that have been Google's partners in making Android phones, and will be partner-competitors by virtue of Google's ownership of Motorola Mobility.

But we'll take Google at its word. What it really wants out of Motorola Mobility is its guts: the patents.

The word "patent" was mentioned 24 times on Google's conference call this morning to discuss the Motorola Mobility deal. Over and over, Google newbie CEO Larry Page and other executives talked about how Motorola Mobility's portfolio of thousands of patents will help protect Google and its Android phone software from "anti-competitive threats" from Microsoft, Apple and other companies.

Remember that Google lost out to Apple, Microsoft and others in an auction of a patent trove owned by failed Canadian telecom firm Nortel Networks. Google has sounded harsher and harsher notes — [particularly against old rival Microsoft](#) — over their recent maneuvers in intellectual property auctions.

Microsoft, Apple and Oracle have sued Android licensees HTC, Motorola and Google itself over allegations of intellectual property violations. Google's top lawyer David Drummond has called the lawsuits "hostile organized campaign against Android by Microsoft, Oracle, Apple and other companies, waged through bogus patents."

Drummond and other Google executives wouldn't talk about the litigation in today's conference call. But Drummond did refer to having Motorola's patent portfolio to "protect the ecosystem" of the Android software. Google also [rolled out quotes](#) from the phone makers that use Android— HTC, Samsung, Sony Ericsson and LG

— that mysteriously all use some variation on “defending” Android. Think these guys are hewing to the talking points?

Wall Street seems to approve of Google's patent war, even if \$12.5 billion seems a steep pricetag for a shield against lawsuits.

“The big thing it plugs for Google is: Google's patent portfolio is only a few thousand, and they have been the target of a significant amount of patent litigation,” Evercore Partners analyst Alkesh Shah said. “Motorola's patent portfolio provides a very strong defense against all this litigation.”

— *Matt Jarzemsky contributed to this post.*

INDUSTRY / ACTIVITIES

Type of entity:Industrial company

Trade description

Google Inc. (Google) is a global technology company focused on improving the ways people connect with information. The Company generates revenue primarily by delivering online advertising. As of December 31, 2011, the Company's business was focused on areas, such as search, advertising, operating systems and platforms, and enterprise. Businesses use its AdWords program to promote their products and services with targeted advertising. In addition, the third parties that comprise the Google Network use its AdSense program to deliver relevant advertisements that generate revenue. In June 2011, the Company launched Google+, a way to share online. As of January 2012, over 90 million people had joined Google+. In April 2011, the Company acquired PushLife. In September 2011, the Company acquired Zagat. In May 2012, Google acquired Motorola Mobility Holdings, Inc.(MMI).

Description and history

Search

The Company maintains an index of Websites and other online content, and makes it available through its search engine to anyone with an Internet connection. Its search technologies sort through information to deliver relevant search results in response to user queries. The Company integrates features into its search service and offer specialized search services to help users tailor their search. In January 2012, the Company launched Search plus Your World. When a user performs a signed-in search on Google, the user's results page may include Google+ content from people that the user is close to (or might be interested in following). Relevant Google+ profiles and Google+ pages related to a specific topic or area of interest may also appear on a user's results page.

Advertising

Advertising includes Google Search, Google Display, Google Mobile and Google Local. AdWords is the Company's auction-based advertising program, which delivers advertisements that are relevant to search queries or Web content that they are a form of information in their own right. With AdWords, advertisers create text-based advertisements that then appear beside related search results or Web content on its Websites and on partner Websites in its Google Network, which is the network of third parties that use the Company's advertising programs to deliver relevant advertisements with their search results and content. Most of its AdWords customers pay the Company on a cost-per-click basis, which means that an advertiser pays Google only when a user clicks on one of its advertisements. The Company also offers AdWords on a cost-per-impression basis that enables advertisers to pay the Company based on the number of times their advertisements appear on its Websites and its Google Network Members' Websites as specified by the advertiser. Its AdSense program enables Websites that are part of the Google Network to deliver advertisements from its AdWords advertisers that are relevant to the search results or content on their Websites.

The Company's Display advertising comprises the videos, text, images, and other interactive advertisements that run across the Web on computers and mobile devices, including smart phones and handheld computers, such as netbooks and tablets. The Google Display Network provides advertisers services related to the delivery of display advertising across publishers participating in its AdSense program, publishers participating in the DoubleClick Ad Exchange, and Google-owned sites, such as YouTube and Google Finance. Through its DoubleClick advertising technology, the Company provides to publishers, agencies, and advertisers the advertisement serving technology. Its DoubleClick Ad Exchange creates a real-time auction marketplace for the trading of display ad space. In addition, YouTube provides a range of video, interactive, and other advertisement formats for advertisers to reach their audience. YouTube's video advertising solutions give advertisers a way to promote their content to the YouTube community, as well as to associate with content being watched by their target audience. YouTube also offers analytic tools to help advertisers understand their audience and derive general business intelligence.

Google Mobile extends its products and services by providing mobile-specific features to mobile device users. The Company's mobile-specific search technologies include search by voice, search by sight, and search by location. Google Mobile also optimizes a number of Google's applications for mobile devices in both browser and downloadable form. In addition, it offers advertisers the ability to run search ad campaigns on mobile devices with mobile-specific advertisement formats, such as click-to-call ads in which advertisers can include a phone number within ad text. AdMob, Inc. (AdMob) offers advertisement units and solutions for application developers and advertisers. Google Local provides users with relevant local information. The Company has organized information around more than 50 million places globally from various sources across the Web. Users can find addresses, phone numbers, hours of operation, directions and more for millions of local queries like shops, restaurants, parks and landmarks on Google.com, on Google Maps and on Google Maps for mobile. They can also discover more places that are right for them by rating the places they've been, and getting recommendations based on their tastes and those of their friends directly within Google Maps. Its products and services also enable business owners manage their online presence and connect with potential customers. Millions of business owners have verified their free business listings via Google Places to ensure that users have up-to-date information about their establishments, and to contribute additional detailism, such as photos and products/services offered. Google Offers brings people daily deals from local and national businesses, redeemable for discounted goods or services. From restaurants to spa treatments to outdoor adventures, Google has deals from the businesses a city has to offer, as well as national brands.
